

ELITHERM PVC WINDOW PROFILES - GUARANTEE DOCUMENT

ELITHERM pvc window profiles are made from rigid pvc of increased impact resistance, using the latest technological knowledge and production methods.

ELITHERM pvc window profiles are environmentally friendly and heavy metal free.

Within a 5 (five) years period from the date of supply, we will replace faulty profiles free of charge, where the defects are shown to be attributable to production faults at our works. No compensation will be paid for consequential loss.

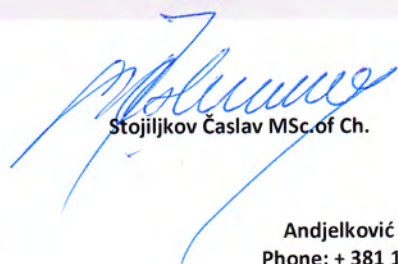

The guarantee is given under the terms of the manufacturing specifications of "Andjelkovic al d.o.o.", and the quality and test regulations governing pvc windows, EN 12608 and RAL GZ 716/1 and covers:

- Consistency of shape in accordance with the drawings,
 - Resistance to chemicals to DIN 16929,
- Weather tightness and weather resistance to EN 12210,
 - Resistance to impact stress ISO 179-1,
 - Thermal insulation to EN ISO 12567-1,
 - Sound insulation to EN ISO 140-1, and
- Flammability and self-extinguishing to SRPS G.S2.659.

The guarantee applies to white profile and to foil laminated, colored and decorative versions.

We are not liable for manufacturing or installation faults by third parties.

We can only acknowledge claims under the guarantee if the defects notified to us immediately upon discovery.
